NEW PRODUCTS COMING SUMMER 2002

Cyclops Electronics Company Inc.
1519 E. Chapman Ave. # 305
Fullerton, CA 92831

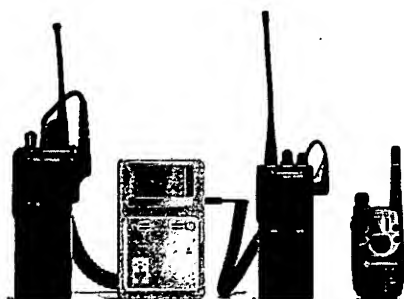

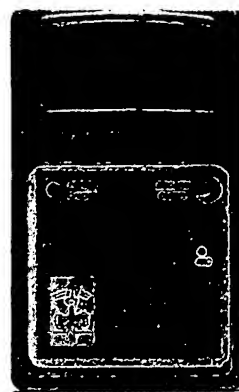

**HERE IS THE INFORMATION
YOU REQUESTED**

EXHIBIT A

Thank you for your inquiry of **Cyclops Electronics**, regarding our new law enforcement product. **Cyclops Electronics** has invented the world's first intrusion detection radio appliance. Our unit makes use of an asset most departments already have — hand held radios.

Many officers have asked what is this thing? Cyclops units combine passive inferred motion sensors with a stored audio chip. The components are run by a microprocessor and powered by a 9-volt battery. These in turn are housed in a fiberglass reinforced nylon body. Anyone familiar with military ammunition crates knows how strong this material is.

Cyclops sensors are connected to your hand held radio via a cable placed in the input jack. Radios that use multi pin connectors can still be used but you will need to provide your model number to us. These are available for an additional charge.

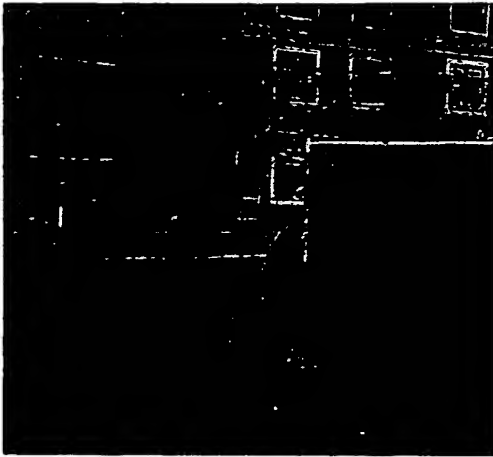

The Cyclops set includes 3 standard cables with 2 1/2 mm plugs in stereo or mono.

We are able to provide multi pin connectors to those agencies that require them for an additional charge. See order form for details.

HOW DO I USE THE CYCLOPS

Picture 1

Picture 2

We recommend that Cyclops units be used at choke points and placed blind to the suspect. As in the above photos, (#1) from the street this just looks like a gate to a construction site, which it is. But you don't see anything unusual until you go past the gate. (#2) At this point the suspect has already been detected and law enforcement notified of his or her location.

The same scenario is used in the office pictured at right. Once your suspect comes through the doorway behind your team, the Cyclops mounted on the file cabinet will report his location.

CYCLOPS CARRYING CASE

The standard Cyclops set includes:

- 3 Cyclops Sensors
- 3 Standard cables
- 3 extra removable backs
- 1 instructional video.

FREQUENTLY ASKED QUESTIONS

Q: Can this unit be used outdoors?

A: Yes, but we suggest only when you can see them because every little kid, dog, cat, etc. can set them off. We tested Cyclops for two years on Southern California construction sites and their performance in rain, sun and lots of dirt never diminished their ability to notify site personal of people or equipment coming on site.

Q: How long will the batteries last?

A: We have tested Cyclops units for more than 250 hours. However we recommend changing batteries every 75 hours. Clocking people and equipment on and off a job site is not life threatening, but pursuing a suspect in a building can be. Please be safe and change batteries every 75 hours of use or once a year.

Q: Do radios used with Cyclops units need to be VOX capable?

A: Yes.*

Q: Do Cyclops units false alarm?

A: As a rule no. However, low batteries, improperly placed units, or Cyclops units placed on unsecured objects, open doors, air conditioners, all these things can and will cause false alarms. When you receive your Cyclops units, you will find a list of Do's and Don'ts in the operators manual.

Q: How do I attach or place a Cyclops so it stays in place?

A: All Cyclops units come with removable backs. Magnetic ones for metal surfaces; hook and loop for nonmetallic walls and glass; and a blank one for use with adhesives of your choice. Also they are built to stand up on a flat level surfaces. The removable backs slide on in only seconds.

* Non VOX radios like Kenwood or Erickson can still be used with a Cyclops Product, but they require a type of signal amplifier be installed when the Cyclops is made. Please call for more details.

Cyclops Electronics, Inc. is a small, young company and cannot grant credit or accept purchase orders at this time. Please include checks or money orders when ordering.

Turn around time is about 5 to 6 weeks. This is a very specialized product, and is not manufactured until you place the order. All orders are shipped UPS ground or registered mail.

**Cyclops Electronics Co., Inc. manufactures
products that are for Law Enforcement and
Approved Government agency sale only.**
